

# DEGREES of CELLULAR HEALTH

## 360 Mist: A Nutritional Breakthrough

At LiveSmart 360, the biggest thing in product development is actually quite small. At the microscopic level of human cells, our proprietary product 360 Mist enhances nutrient absorption and supports healthy cell performance.

### 360 Mist delivers:

- Cellular energy that lasts all day
- A unique, patent-pending delivery system
- Mental clarity and focus
- Support for a stronger immune system
- Removal of toxins and waste from the cells
- Defense against the effects of free radicals

## Patent-Pending Technology

As part of a multi-million dollar deal, 360 Mist features proprietary ZorbMax technology. This nutritional breakthrough is both cellular and electromagnetic, as research scientist and electrolyte expert Dr. Shawn Mueller explains: "An electromagnetic charge is critical to every process in the human body. The quality of these charges is linked to the health of cells. By delivering a rapid increase of osmotic pressure, 360 Mist speeds absorption, enabling the body to take maximum advantage of the nutrients in foods and supplements. The cell is where health begins and ends. That's why increased cellular energy is so profound and powerful!"

ZorbMax is also odorless and tasteless, and is safe to use throughout the day for results anytime. By combining the quick absorption ZorbMax provides with the superior delivery system of a mist spray, you get nutrients delivered directly to targeted cells for the greatest nutritional advantage. Unlike pills or tablets, 360 Mist is absorbed quickly by your body for fast results you can feel right away.

## Target Nutrition to Your Specific Needs

Up to 60 percent of all adults in North America take a multivitamin supplement every day. The fatty layer of the cell wall in undernourished cells makes absorption of these nutrients difficult. 360 Mist addresses this challenge directly by hydrating the collapsed cell, and preparing the cell to accept nutrition. The nano-sized electrolytes in the product are small enough to penetrate the cell membrane. They bind with nutrients and carry them into the cell. Those nutrients are then transferred to wherever they are needed. In this way, 360 Mist creates a balanced and constant energy throughout the body.

360 Mist is packaged in a convenient hand-held spray that supports healthy cell performance throughout the day. The proprietary ZorbMax technology is also available in five other mists that target a specific health need:

- **Zip** – Natural energy
- **Relieve** – Pain relief
- **Ignite** – Intimacy enhancer
- **PM** – Sleep aid
- **Slim** – Weight control

LiveSmart 360 also infuses ZorbMax into its full line of nutritional, weight-loss, and energy products so that every supplement you take is absorbed quickly for maximum impact. 360 Mist, the standalone ZorbMax formula, boosts your cellular health on its own, but also works to boost the nutritional value of all your foods and supplements.

*"In over 20 years of testing blood, I have never seen such a quick result from a nutritional product without months of treatment."*

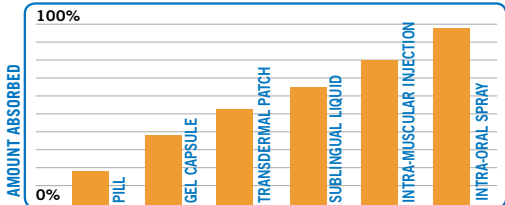

- Lab Technician • Naples, Florida

## Meet Dr. Shawn Mueller

Dr. Shawn Mueller is known as an authoritative research scientist in the field of trace minerals and electrolytes. Backed by a doctorate in naturopathy, plus degrees in the fields of exercise science, psychology, phlebotomy and neuromuscular therapy, this naturopathic doctor spent years researching and developing cutting-edge technologies and nutritional innovations. Dr. Mueller is one of the experts on the LiveSmart 360 Medical Advisory Board.

### NUTRIENT DELIVERY SYSTEM ABSORPTION RATES

This graphic is taken from the Physicians' Desk Reference (PDR) and is intended for the general purpose of showing that ingested liquids are more readily absorbed than pills and gel capsules.

## Rejuvenate the health of your cells

One of the most important features of a healthy red blood cell is its ability to maintain maximum hydration, or what is also referred to as osmotic pressure. Under a microscope, this essential characteristic is similar to a fully inflated basketball – the cell becomes round and tight. Electromagnetically charging the cells enhances their osmotic pressure, thus inducing rapid cellular hydration and the ability to carry oxygen, vitamins and minerals into the cells.

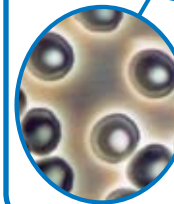

You may hear terms like "osmotic pressure" and "electromagnetic charge" and think that cellular health is too complex for the average person to comprehend. It's not! Simply take a look at the results of this simple blood test, which shows red blood cells before and after using the 100% ZorbMax formula of 360 Mist. These photos are truly worth a thousand scientific terms!

**1. BEFORE:** These are the red blood cells of a 19-year-old man under a high-intensity microscope. When the cells cluster this way, it shows a lack of hydration, oxygenation, and lubrication. These cells suffer the inability to absorb essential vital nutrients required for optimum cellular function and vitality.

**2. 360 MIST:** The young man sprays two servings of 360 Mist.

**3. AFTER:** Two minutes later, under the same microscope, this young man's red blood cells are in a much healthier state, instantly hydrated, and ready for maximum absorption of essential vital nutrients.
